

MANUFACTURING EFFICIENCY ASSESSMENT PROGRAMME

Free 45-minute on-site assessment. Written report in 5 working days.

Free

No cost, no obligation

45 min

On-site time

5 days

Report turnaround

12-15 pg

Health Report

WHY THIS PROGRAMME EXISTS

Indian manufacturing MSMEs operate at only 14% of the productivity of large companies (World Economic Forum, 2024). Most of this gap is engineering execution — drawing quality, informal DFM, missing simulation, weak version control. These are addressable, but no free intervention currently serves them. MEAP exists to close that gap, one manufacturer at a time, in the Pune-Satara corridor.

WHAT YOU RECEIVE

- **Six-dimension grade card**
Scored across design process, drawing quality, simulation, DFM, lead time, and cost efficiency. Visual radar chart and overall grade (A-D).
- **Five+ specific findings, quantified in rupees**
Each finding cites observed evidence and includes a defensible cost range — typically ₹3-10 lakh in recoverable annual inefficiencies per company.
- **Free recommendations, sequenced by horizon**
Quick wins (under 2 weeks, no cost), medium-term (1-3 months, low cost), strategic (3-12 months). Implementable by your team without engaging us further.
- **Optional engagement scopes**
Three specific paid project options if you want to accelerate any improvement. Scope, timeline, fixed price stated upfront. Completely optional.

THE 7-STEP PROCESS

- 1 Initial contact**
We send an introduction letter. Phone follow-up within 3 working days to schedule the visit.
- 2 Pre-visit confirmation**
WhatsApp confirmation 24 hours before visit. We arrive at your security gate 10 minutes early.
- 3 On-site assessment**
45 minutes total: 5-min introduction, 15-min structured questionnaire, 15-min shop floor walk, 10-min preliminary verbal findings.
- 4 Score and analyse**
We score your engineering operation across six dimensions and quantify the financial impact of each finding.
- 5 Report draft**
12-15 page Engineering Health Report drafted with charts, specific findings, and tailored recommendations.
- 6 Report delivery**
Within 5 working days, you receive the report by email. Strictly confidential, prepared for your team only.
- 7 Walkthrough call**
Optional 20-minute call to walk through the findings. Answer questions, discuss recommendations. No pressure to engage further.

QUICK QUESTIONS

Why is it free?

We're building a regional engineering dataset and credibility. Some companies engage us for paid work after the report. Most don't, and the report is genuinely free either way.

Will you ask for confidential data?

No. We ask only operational and process information. We can sign an NDA before the visit. We never request drawings, designs, or trade secrets.

What if we already have a consultant?

Independent assessment can complement existing work. The report goes to you — your team can use it however they like, including ignoring it.

READY TO SCHEDULE AN ASSESSMENT?

Reach out directly. We'll respond within 24 hours.
